

For me a real teacher is ^{Опытный} clever and ^{Понимает} understanding person. The profession of a teacher perhaps one of the most crucial and important on Earth, because the teacher trusted very much the training of mind, heart and soul of the child.

For me one of the most important qualities of a real teacher is responsible. It is very important that the teacher was prepared for class, never forgot that the most important thing is to give the child knowledge. It is also important for the quality of the teacher's skill in an interesting manner to present your subject so that the student understood and was interested getting knowledge.

I think for me the worst trait of a teacher excessive strictness. If a student doesn't understand the teacher should explain and not to require knowledge.

In the end I understood, what profession teacher very responsible and important. I respect all teachers for their work.
