

Being a teacher is one of the most important jobs.

~ It is also one of the first professions.

Our school has a lot of wonderful teachers and each of them interested in studying many subjects. They are very kind, intelligent, educated, just and understanding persons. The school the ideal teacher is a person who can join the teaching staff will not interfere in it, will humbly complete all paperwork necessary

~ to participate in meetings, take place - again humbly - all training courses, and other activities of the higher authorities. Who in

the class won't be high-profile incident, and the children will be happy to go to his lesson and ~~stress~~^{ss} free to go after him. Ideally

the teacher notices several students that can deeply learn the subject matter and

~ trains them to participate and good result.

And also like to say a huge thank you to all of our dear and respected teachers.

After all, they do a great job; contribute to the education of every child, give

knowledge and help to understand us in what we want to be and who we can become! And for this, I want wish

~ all the teachers a lot of patience and a lot of time and even in their working hours. I have great respect

for this profession and people who
do it are very noble.
