I think that a teacher it is most difficult, but also most wonderful profession.

A teacher it is ~~any~~ person who should be very kind, educated, friendly and hard-working.

This job which connects with children. First for children a teacher should be example "a really wise person". If a teacher doesn't like children means that this teacher isn't really.

I grew in a family where my mother and grandmother - are teachers. I a lot of know about this profession.

I think that my mom it is a real teacher, because she can able to make character of children, also children: very respect my mom. And I also respect my mom.

Often say that old teacher it is bad teacher. I don't agree with this opinion. Young teacher very good understand children, he is modern teacher, funny and just, but sometimes he is can be witty firm and serious.

Old teacher usually very wise and concentrated, also he can be witty and cherry disposition.

I think that young teachers and old teachers very difficult, but ~~man~~ of them are bad.

In a conclusion I want to say that

teacher should in it's own special, but they
always should remember that they are
main example for children!
