

Nowadays main problem of modern teacher is monotonous work every day and a lot of children.

- I think that job of a teacher would be enjoyed, attractive, bouncy and creative. Teacher must love his pupils, play with them and give his experience and skills. He could be kind, polite, good educated and companion class work with interesting game. Opposing opinion that teacher don't concentrate on work when he play with children. And teacher couldn't be a wizard and companion a lot of things.

- Yes, of course teacher couldn't be a wizard but he should make pupils believe in magic on his subject. He must be respected friend for children. If he would be planned his time for work and play in games. He could give information and skills in fun game form. When teacher play with children his ~~work~~ work never be boring and monotonous, only a lot of fun. He always have a good imagination when go to work. If teacher would have good attitude to his pupils, they would have good attitude to him. Of course have bad pupils who never have good attitude.

Every teacher use abilities and skills in their work but some don't show all their experience. If man choose job of teacher he would try anything to develop his skills and his hard work would be rewarding. That I see ideal teacher.
